ADEKUNLE ABDULLAHI HASSAN

STRUCTURAL STEEL FABRICATION & CONSTRUCTION SUPERVISOR

Phone / WhatsApp: +234 905 460 1300 | Email: kunlekunle999@gmail.com | Nigeria

APPLICATION TARGET: STRUCTURAL ENGINEER (CONTRACT, HYBRID) - PRACTICAL STRUCTURAL WORKS / SITE SUPERVISION

PROFESSIONAL PROFILE

Civil Engineering National Diploma holder and hands-on structural steel fabrication and construction supervisor with more than 28 years of practical experience across workshop and site operations. Experienced in supervising structural steel fabrication and erection, interpreting approved structural and fabrication drawings, coordinating manpower and materials, monitoring workmanship and progress, and maintaining quality and safety standards. Brings international project exposure in the UAE and Saudi Arabia, together with extensive Nigerian construction experience. Strongest contribution is in practical site execution, structural-works coordination and workforce supervision.

CORE COMPETENCIES

• Structural steel fabrication, assembly and erection	• Workshop, site and construction-team supervision
• Interpretation of approved structural / fabrication drawings	• Fit-up, marking-out, cutting and welding coordination
• CO2 welding process coordination and fabrication workflow	• Quality checks, workmanship monitoring and defect follow-up
• Manpower planning, task allocation and team leadership	• Material coordination and production / progress monitoring
• Contractor, engineer and management coordination	• HSE awareness and safe-work compliance

PROFESSIONAL EXPERIENCE

Structural General Foreman | NAIRDA Construction Company, Abuja, Nigeria | 2022-2025

- Led day-to-day site teams and coordinated structural and construction activities against approved drawings, site instructions and work schedules.
- Organised labour, work allocation, materials and task sequencing; monitored progress and raised execution issues for timely resolution.
- Checked workmanship and supported compliance with project quality and health-and-safety requirements.

Supervisor | Bullet International Construction Company, Abuja, Nigeria | 2020-2023

- Supervised project and workforce activities, coordinating daily work plans, manpower, materials and site requirements.
- Monitored work progress and workmanship, supported corrective actions and communicated updates to management.
- Promoted safe work practices and completion of assigned activities to required specifications and timelines.

Fabrication Foreman | Al-Shafar Steel Engineering Company, Dubai, UAE | 2011-2013

- Supervised structural steel fabrication and workshop operations, including drawing interpretation, fit-up, welding coordination and assembly.
- Coordinated fabricators, fitters and welders, daily production priorities and material flow to meet project requirements.
- Monitored fabrication quality, safe working practices and production progress.

EARLIER EXPERIENCE

General Foreman / Foreman | FUBA Engineering Construction Company, Ibadan, Nigeria | 1991-2002

- Held General Foreman and Foreman responsibilities, supervising construction work crews and coordinating daily field activities.
- Allocated tasks, organised manpower and monitored work progress, workmanship and safe execution.
- Worked with construction drawings and site instructions while coordinating with project management and other trades.

INTERNATIONAL PROJECT EXPOSURE

United Arab Emirates: Al-Shafar Steel Engineering Company, Dubai. | Saudi Arabia: Arabian International Construction Company (AIC) project experience.

EDUCATION

National Diploma (ND), Civil Engineering - Kwara State Polytechnic, Ilorin	**1983-1985**
West African Senior School Certificate / WAEC - Offa Grammar School	**1982**

ADDITIONAL EMPLOYER / PROJECT EXPOSURE

Other fabrication and construction experience includes Sevan Construction Nigeria Ltd, Nivafer Engineering & Construction Ltd, Dalal Steel Industries, Salyek Steel Ltd, Iron Products Industries Ltd, Mikano Steel Factory and Metal Berg Manufacturing Company.

TECHNICAL AND PROFESSIONAL STRENGTHS

- Practical knowledge of steel fabrication and structural construction workflows, from preparation and fit-up through assembly and erection.
- Able to coordinate work with engineers, architects, contractors, fabricators, fitters, welders and site teams.
- Focused on following approved drawings and technical instructions, raising discrepancies for review by the responsible engineer, and maintaining quality and safety.
