No. 4, Afolabi Rasiki street, Offatedo,
Osun state.

PROFILE

- A dedicated and versatile Agronomist with a Bachelor's degree in Agronomy from Osun State University and over five years of hands-on experience across poultry, crop production, and broader sectors of the labor market. I bring a strong understanding of sustainable farming practices, soil and crop management, and agricultural business operations. My background combines technical proficiency with practical field experience, having successfully overseen diverse agricultural projects and contributed to increased yields and farm efficiency.
- With a proven ability to build and maintain strong stakeholder relationships, I consistently seek to add value through innovation and trust. I am highly adaptable, detail-oriented, and thrive in dynamic, high-impact environments. Driven by a passion for agricultural development, I am eager to apply my expertise and problem-solving skills to advance the goals of forward-thinking agricultural or agribusiness organizations.

RELEVANT EMPLOYMENT HISTORY

2020 — 2024 SUBSISTENT FARMING PRACTICE

- Cultivated and managed small-scale farmland for household food production, focusing on staple crops such as maize, cassava, and vegetables.
- Prepared farmland using manual tools and traditional methods, including clearing, tilling, and ridge-making.
- Planted, weeded, and harvested crops based on seasonal cycles and weather patterns.
- Reared small livestock (poultry) for family consumption and minor local trade.
- Preserved and stored farm produce using local techniques to ensure food availability throughout the year.

Oct 2021 — Oct 2022 TEACHER (NYSC), ALGHAYAH COLLEGE, IBADAN

- Taught and evaluated students in Mathematics, Basic Science and Introductory Technology, ensuring curriculum objectives were met.
- Prepared lesson plans, teaching aids, and classroom materials to enhance student engagement and understanding.
- Conducted tests, assignments, and examinations, and provided constructive feedback to support student development.
- Participated in school activities, including academic competitions, assemblies, and community outreach programs.
- Maintained classroom discipline and created a supportive learning environment that encouraged student participation.

April 2019 — October 2019 INTERN, Institute of Agricultural Resource & Technology (IAR&T)

- Assisted in daily farm operations such as planting, weeding, watering, and harvesting of experimental and demonstration crops.
- Monitored and maintained crop health, identifying signs of pests or diseases and applying appropriate treatments under supervision.
- Operated basic farm tools and machinery, including hoes, sprayers, and irrigation systems to support field activities.
- Supported livestock care, including feeding, cleaning pens, and monitoring animal health in poultry or other units.
- Collected and recorded field data, contributing to accurate documentation

of crop performance and input usage for ongoing research projects.
