Professional summary

Professional Experience Summary:

I am a Data Analyst and IT Professional with 10 years of experience at RNL, specializing in Python, SQL, Power BI and Cisco Networking (Network Administration) to transform data into actionable insights and improve business operations. During my time at RNL, I leveraged data analytics and IT to identify cost-saving opportunities across logistics, vehicle maintenance, and fuel management, contributing to significant reductions in operational expenses.

I also developed and implemented automation solutions using Python and SQL to streamline repetitive processes within the haulage department. These solutions reduced manual workload, saved significant time, improved data accuracy, and increased overall operational efficiency.

Key Skills & Achievements:

- 10 years of professional experience in data analytics
- Advanced data analysis using Python and SQL
- Data visualization and business intelligence using Power BI
- Cost optimization across logistics, maintenance, and fuel operations
- Automation of repetitive business processes
- Data-driven decision-making and operational improvement
- Process optimization and efficiency enhancement
- Development of analytical reports and dashboards
- Zero Down time in Network Management
