FIDELIS TERKIMBI

DEVOPS ENGINEER

Nigeria | GitHub: github.com/Fidelisterkimbi

Email: terkimbifidelis07@gmail.com | Phone: 08066430386

PROFILE

Project-focused DevOps candidate with practical work across AWS infrastructure, Docker containers, and web applications. Technical focus includes Terraform, Linux, GitHub Actions CI/CD, PostgreSQL, Flask, and NestJS. Developing Kubernetes knowledge to extend container deployment and orchestration skills.

TECHNICAL SKILLS

Cloud and infrastructure AWS, EC2, VPC, Terraform, Linux

Containers and delivery Docker, Git, GitHub, GitHub Actions CI/CD

Applications and data PostgreSQL, Flask, NestJS

Currently learning Kubernetes fundamentals and container orchestration

SELECTED PROJECTS

AWS Infrastructure with Terraform

AWS EC2 | *VPC* | *Terraform* | *Linux*

- Infrastructure project focused on defining AWS EC2 and VPC resources with Terraform.
- Applied infrastructure as code concepts to cloud compute and networking configuration, with Linux as the server environment.

Dockerized Expense Tracker

Docker | *Web application deployment*

- Containerized an expense tracking application to package the application and its runtime dependencies.
- Used the project to practice container-based application setup and repeatable local execution.

Capturevento

Application development project

- Developed Capturevento as a practical application project within a broader focus on backend development and deployment.
- Connects application development experience with ongoing learning in cloud infrastructure and delivery workflows.

PROFESSIONAL FOCUS

DevOps Engineer
