Ring Road, Ibadan, Oyo State | 08062391819 | hamzathabeeblahi@gmail.com

PROFESSIONAL SUMMARY

Agricultural Technology graduate from the Federal University of Technology, Akure, currently working as a realtor in Ibadan, helping clients buy land and residential properties. Hands-on experience in marketing properties, generating leads, conducting property inspections, negotiating with buyers and guiding clients through the sales process. Supervises a farm team and has taught in the classroom, which has built strong communication and people skills. NYSC-certified.

WORK EXPERIENCE

Realtor 2026 – Present
Footy Homes and Properties, Ibadan, Oyo State

- Assist clients in buying land and residential properties by marketing available properties, generating leads, identifying potential buyers, and building and maintaining strong client relationships.
- Provide accurate property information, conduct property inspections and follow up on inquiries.
- Negotiate with prospective buyers and guide clients through the entire sales process to ensure smooth transactions and customer satisfaction.

Farm Supervisor 2026 – Present
Durante Farm, Ibadan, Oyo State

- Supervise broiler production from day-old chicks through to market-ready birds, making sure each batch reaches a healthy market weight.
- Oversee daily flock management, including feeding, watering, brooding and housing conditions.
- Monitor flock health and growth, and keep vaccination and biosecurity routines on schedule.
- Direct farm workers, assign daily tasks and keep farm records up to date.

Basic Technology & Computer Studies Teacher 2025 – 2026
Secondary School (NYSC Posting) — Ibadan, Oyo State

- Taught Basic Technology and Computer Studies, improving students' technical and digital skills.
- Designed simple, engaging materials that raised classroom participation and academic performance.
- Created a positive, curiosity-driven classroom, building communication and instructional design skills.
- Equipped students with practical computer skills aligned with today's technology-driven workforce needs.

Agricultural Research & IT Trainee 2023
Institute of Agricultural Research and Training (IAR&T) — Ibadan, Nigeria

- Conducted hands-on research in crop production, soil management, and integrated pest control strategies.
- Leveraged digital tools and IT systems to support agricultural data collection, analysis, and research documentation.
- Contributed to ongoing projects targeting improved crop yields and sustainable farming practices.
- Collaborated with researchers and extension officers, strengthening teamwork and problem-solving capabilities in a professional research setting.
