PROFESSIONAL SUMMARY

Experienced Farm Management Professional with over five years of practical experience in livestock and farm operations management, including poultry production systems. Proven ability to supervise farm operations, improve livestock productivity, manage farm personnel, control operational costs, and maintain high biosecurity and environmental standards. Skilled in farm planning, budgeting, operational reporting, and implementing efficient farm management practices that improve profitability and sustainability.

CORE COMPETENCIES

Farm Operations Management

Extensive experience overseeing daily farm operations, coordinating production activities, and ensuring efficient utilization of farm resources to achieve productivity targets.

Livestock & Poultry Production

Skilled in monitoring livestock health, managing feeding programs, improving productivity, and maintaining high biosecurity and environmental standards.

Budgeting & Cost Control

Experienced in preparing operational budgets, monitoring expenses, and implementing cost-effective strategies to improve farm profitability.

Staff Supervision & Training

Strong leadership ability in supervising farm workers, organizing work schedules, and providing training to improve workforce efficiency and compliance with farm procedures.

Health, Safety & Biosecurity Compliance

Ensuring adherence to health, safety, and environmental regulations while implementing strict biosecurity measures to protect livestock and farm assets.

Reporting & Farm Record Management

Proficient in maintaining accurate farm records, production reports, and operational documentation using Microsoft Office tools.
