[B.SC. Business Administration]

Government Technical college, Oyo State
2015 - 2018
NABTEB O LEVEL CERTIFICATE

WORK EXPERIENCE

Dynatech (UAE) – Frontend Flutter Developer
October 2025 – February 2026

- Designed and implemented intuitive user interfaces for mobile applications using Flutter, ensuring a seamless user experience across various devices.
- Consumed RESTful APIs from backend services, integrating data into the application and handling responses to display dynamic content to users.
- Collaborated with the development team to optimize app performance, debugging and resolving UI-related issues to ensure a smooth and responsive application.

JUKIT-PACK - Software developer
2025

- Designed and built responsive, scalable web applications using HTML, CSS, JavaScript, and frameworks like React, Angular, or Vue.js, delivering engaging user experiences and robust functional
- Developing high-quality, user-friendly mobile applications using Flutter, Firebase, or native technologies, ensuring seamless performance and intuitive interfaces.Design

Taberah Tech - 2020–
November 2021 Software developer

- Developed and maintained a secure fintech web application using PHP for backend logic and HTML, CSS, and JavaScript for responsive frontend design.
- Implemented user authentication and authorization systems to protect sensitive financial data.
- Built dynamic dashboards and transaction interfaces with real-time data updates using JavaScript and AJAX.

- Integrated secure payment gateways and APIs to process online transactions efficiently.

- Designed responsive UI components ensuring cross-browser and mobile compatibility.

- Implemented form validation and data sanitization to enhance security and prevent vulnerabilities such as SQL injection and XS

FREELANCER

January 2020 – June 2016

Utilized expertise in cross-platform frameworks (e.g., Flutter, React Native) to build high-performance, visually appealing apps for both iOS and Android platforms, ensuring seamless user experiences.

CERTIFICATION

Udemy (Flutter)
2019

Humi Tech – Web and software development
